

361 Global Long/Short Equity Fund

This chart illustrates how during the most recent MSCI World Index drawdown, the Fund was able to capture equity returns while managing drawdown risk.

Performance as of 3/31/2018	1Q18	1 Year	3 Year	Since Inception 1/6/2014	During Drawdown 5/21/2015 – 12/8/2016
361 Global Long/Short Equity Fund I	0.17%	10.44%	7.83%	8.35%	8.21%
MSCI World Index	-1.28%	13.59%	7.97%	7.68%	-0.27%

Returns shown over one year are annualized. Returns include the reinvestment of dividends and income. Annual Expense Ratio: Net 2.11%/Gross 2.21%. Includes dividend and interest expense on short sales, acquired fund fees and expenses. When excluded, the net with limitation expense ratio is: Class I 1.50%, Investor Class 1.78%. See reverse for more information.†

Source: Morningstar. Data from 5/21/2015-12/8/2016. The timeframe was selected based on the beginning date and the end date of the MSCI World Index's most recent drawdown. Returns include the reinvestment of dividends and income.

Past returns shown do not guarantee future results. Current performance may be lower or higher. Call 888-736-1227 for the latest month-end returns. Return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than original cost. Other share class performance may vary.

Overall Morningstar Rating™

Based on risk-adjusted returns as of 3/31/18

Class I Shares among 191 Long-Short Equity Funds

You should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. For a prospectus, or summary prospectus, that contains this and other information about the Funds, call 1-888-736-1227 or visit our website at www.361capital.com. Please read the prospectus or summary prospectus carefully before investing.

The 361 Global Long/Short Equity Fund is among 191 in the Long/Short Equity funds derived from a weighted average of the fund's three-, five- and 10-year risk-adjusted returns as of 3/31/2018. For the 3 year period, the Fund was rated 5 stars out of 191. Past performance is no guarantee of future results. Ratings reflect fee waivers in effect; in their absence, ratings may have been lower.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Investing involves risk, including possible loss of principal. The potential loss from a short sale is theoretically unlimited since the appreciation of the underlying asset also is theoretically unlimited. Foreign investment entails additional risk from adverse changes in currency exchange rates, tax regulation, and potential market instability. Frequent trading by the Fund may reduce returns and increase the number of taxable transactions. Concentration of its portfolio in relatively few issuers may make the Fund more volatile than a diversified fund.

The Analytic Global Long/Short Equity Fund, L.P. ("Predecessor Account") was a limited partnership that commenced operations on 1/6/2014 and reorganized into the Fund on 12/12/2014. The Fund's objectives, policies, guidelines and restrictions are, in all material respects, equivalent to those of the Predecessor Account. Performance shown prior to 12/12/2014 is that of the Predecessor Account and has not been adjusted to reflect the expenses of the Fund's Class I shares, which are lower than the expenses of the Predecessor Account. If the Class I expenses were reflected, the Predecessor Account returns would be higher than those shown. However, the Predecessor Account was not registered under the Investment Company Act of 1940 and therefore was not subject to certain restrictions on regulated investment companies. If the Predecessor Account had been registered its performance may have been lower.

[†] Reflects contractual agreement to waive and/or pay for certain fees and expenses until 2/28/2019.

The **MSCI World Index** is a free float adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The index includes reinvestments of dividends, net of foreign withholding taxes.

A **Drawdown** is the peak-to-trough decline during a specific record period of an investment, fund or commodity. A drawdown is usually quoted as the percentage between the peak and the trough.
