

Seeking Alpha While Managing Risk

361 Global Long/Short Equity Fund

This chart shows the Fund's top quartile statistical track record.

Source: Morningstar. Data from 01/1/15 to 09/30/20, representing the Fund's first full month of operation. **Peer Group (all funds):** Open End Funds – Long/Short Equity Category. The calculation benchmark for all statistics is the S&P 500 which is the Morningstar assigned benchmark for the Long/Short Equity category. Past performance is not indicative of future results. Portfolio characteristics do not represent or predict the performance of the fund.

361 Global Long/Short Equity Fund

As of 09/30/20

	3Q20	YTD	1 Year	3 Year	5 Year	Since Inception 12/12/14
361 Global Long/Short Equity Fund I	8.29%	3.75%	5.46%	1.93%	4.12%	4.73%
MSCI World Index	7.93%	1.70%	10.41%	7.74%	10.48%	8.19%
Morningstar Long/Short Category	3.95%	-2.29%	1.59%	1.88%	3.23%	2.39%

Annual Expense Ratios: Gross 2.42%; Net 2.39%; and Net Excluding Dividend & Interest on Short Sales 1.47% for Class I. The Gross Expense Ratio includes dividend and interest expense on short sales of 0.92%. The Net Expense Ratio reflects the fee waiver by the Adviser of 0.03%.[†]

Returns shown over one year are annualized.

Past returns shown do not guarantee future results. Current performance may be lower or higher. Call 888-736-1227 for the latest month-end returns. Return and principal value will fluctuate so that shares, when redeemed, may be worth more or less than original cost. Other share class performance may vary.

You should consider the Fund's investment objectives, risks, charges and expenses carefully before investing. For a prospectus, or summary prospectus, that contains this and other information about the Funds, call 1-888-736-1227 or visit our website at www.361capital.com. Please read the prospectus or summary prospectus carefully before investing.

Investing involves risk, including possible loss of principal. The potential loss from a short sale is theoretically unlimited since the appreciation of the underlying asset also is theoretically unlimited. Foreign investment entails additional risk from adverse changes in currency exchange rates, tax regulation, and potential market instability. Frequent trading by the Fund may reduce returns and increase the number of taxable transactions. Concentration of its portfolio in relatively few issuers may make the Fund more volatile than a diversified fund.

[†] The Adviser has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total fund annual operating expenses with certain limitations do not exceed 1.39% until 02/28/21. The expense limitation is exclusive of dividend and interest expenses on short sales, Rule 12b-1 fees, shareholder servicing fees and extraordinary expenses. See the Prospectus for additional details.

Morningstar rankings are based on total return relative to the funds in the same category and includes the reinvestment of dividends and capital gains. Rankings shown are for Class I shares and may be lower for Investor shares due to higher fees and expenses. The rankings may have been lower without fee waivers in effect. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. The Fund was ranked 42% for the 1-year period, 56% for the 3-year period, 53% for the 5-year period and 36% since inception among 207, 182, 139 and 142 funds, respectively. Past performance is no guarantee of future results.

The **MSCI World Index** is a free float adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The index includes reinvestments of dividends, net of foreign withholding taxes. **Morningstar Long/Short Equity Category** is defined as long-short portfolios that hold sizable stakes in both long and short positions in equities and related derivatives. At least 75% of the assets are in equity securities or derivatives. It is not possible to invest directly in an index. **Alpha** measures the difference between a fund's actual and expected returns, based on beta, and is generally used as a measure of a manager's added value over a passive strategy. **Downside Capture** measures how well or poorly an investment manager performed relative to the benchmark during periods when the benchmark has dropped. **Sharpe Ratio** is a ratio developed to measure risk-adjusted performance. In general, funds with higher Sharpe ratios have better risk-adjusted historical returns. **Sortino Ratio** is a ratio developed to measure downside risk-adjusted performance.
